Through field gate and head NNW up the bank ahead. The path soon becomes more obvious and you can see the way ahead cutting across the hillside. Take this and head for the trees.

Follow an indistinct path along the contours of the hill to reach the entrance to the forest. Climb over locked field gate as stile is dilapidated. SN 703 421

Follow logging road through the forest straight ahead over the first crossroads and on for approx. 1 mile. Where the track abuts the edge of the forest and you see a field entrance coming in from the left, take the track on the right off the logging road to walk through the woods. The path descends. At sharp left hand bend, turn right to another logging road. Turn left to leave the forest. (NB if this track is too muddy, you can stay on the initial logging road to bring you to the same forest departure point) SN 686 404

Follow the track down out of the trees, past a farm on the right to join a road where you turn left into Caio.
